

Dr. Mark Spilker

Dr. Mark Spilker's education and training have focused on Mechanical and Biomedical Engineering, with a Bachelor's degree from the University of Utah and a Master's and PhD from the Massachusetts Institute of Technology, where his research was focused on regenerative medicine.

Over his career he has served as co-founder, executive or member of the board of directors for several established and startup companies, as well as non-profit foundations, including a human tissue donation service. He is an accomplished executive with a track record of successful commercialization of innovative medical technologies and has demonstrated success in leading organizations through cultural and structural changes. He previously worked in an executive capacity for Integra LifeSciences and The Musculoskeletal Transplant Foundation, developing and launching multiple technologies in the fields of tissue regeneration and human tissue transplantation.

As of July 2016 Mark took the position of Deputy Chief Scientific Officer at Geistlich Pharma AG. Dr. Spilker grew up in Utah and now lives with his family in Kilchberg, Switzerland.
