

**Our scientific network
is both tightly woven and
widespread.**

Niklaus Stiefel,
Head of Material Research Biochemistry

Exciting challenges await on the path to realizing our vision. We are therefore seeking

Clinical Research Manager

Root

Your tasks

As Clinical Research Manager you will have a leading role in management of clinical investigations with medical devices in the field of the regenerative medicine. You will establish and maintain effective relationships with investigators, clinical teams, vendors, affiliates and consultants. You will be preparing relevant clinical reports and regulatory documents. You will take responsibility to coordinate, plan and execute range of clinical activities for new and registered products.

Your qualifications

You hold a higher educational degree, Ph.D. or M.Sc. in natural sciences or medical disciplines. You have at least four years of practical experience gained from working in a medical device, pharmaceutical or in a CRO environment. You bring in thorough knowledge of clinical product development, understanding of regulatory requirements and GCP principles. You have strong project planning, negotiation, presentation skills and experience in working with intercultural teams. You are fluent in English (oral and written), any additional language skills (German) are assets. You are flexible and able to travel for assigned projects and congresses (about 20%).

Geistlich Pharma is a family-run Swiss company and a longstanding global leader in regenerative dentistry. We have a long tradition of pioneering attitudes that place the focus on employees. These employees are dedicated to the spirit that drives our company to excel: a passion for regeneration. This is the origin of our innovative medical products that reconstruct bones, cartilage and soft tissue. Our motivated team looks forward to working with you in a modern, dynamic environment with international flair.

We look forward to receiving your completed electronic application at: recruiting@geistlich.ch
